

DSServer

Access your digital slide library from anywhere in the world
with the DSServer software solution

Overcome physical distances and optimise workflows with DSServer

Unlock the full potential of your Motic digital scanner with DSServer - the ultimate software solution for hassle-free image library management.

DSServer allows you to say goodbye to the frustrating manual management of large data sets and to streamline your workflow with the automated capture of barcode metadata. DSServer allows easy searching of the entire slide database for library management, enabling you to quickly and efficiently locate the images you need.

To boost scanner versatility even further, DSServer allows you to offer remote access in your own computer, your server or the cloud. With this feature, you can give authorised pathologists unlimited access to your DSServer, allowing them to connect remotely at any time and empowering them to make informed decisions with ease. The enhanced data security features of DSServer enable you to encrypt slides, providing the peace of mind that your images are safe and secure.

Furthermore, the slide management and storage feature allows users to digitise rare, delicate or historic slides, eliminating the risk of slide breakage and loss of irreplaceable patient samples and reducing the physical footprint required for the storage of glass slides.

In short, DSServer is the perfect software solution for the straightforward management of image libraries. Optimise your workflow with DSServer, take your image analysis capabilities to the next level, and experience the power of seamless synergy with Motic digital scanners.

Provide users with remote access to digital slides, improving accessibility to medical professionals and promoting knowledge sharing

Included as standard with the MoticEasyScan Infinity NFC range of scanners; optional for other models

Access from any device with an internet connection, such as your smartphone, iPhone, tablet, iPad, PC and Mac

User-friendly and intuitive slide library management software

Installable in your computer, in your server or in the cloud, providing flexibility to users and facilitating the management of digital slides

Administrators can create an unlimited number of users and authorise access to categories and slides, enhancing collaboration among medical professionals

One-time payment and lack of maintenance costs reduces overall costs for healthcare facilities and patients, giving the administrator full control of the storage

Intuitive functions allow users to capture and save images from digital slides, consult reports, and even create their own, boosting diagnostic efficiency and accuracy

ANYWHERE

The Benefits of Digital Pathology

The numerous benefits of digital pathology, comprising the digitisation of pathology slides, rely on software solutions. The ideal software partner for the Motic range of digital scanners is DSServer. This program, included as standard with the MoticEasyScan Infinity NFC range of scanners and an optional add-on for other models, encompasses an intuitive and comprehensive range of tools to help you get the most out of

your scanner. One of its standout features is its advanced slide management and storage options, which allow authorised users to remotely access your library using any internet-connected device, even mobile devices. Advanced tools are also included for image analysis and annotation. Finally, DSServer enables images to be readily shared among pathologists, facilitating remote consultations and diagnoses and boosting productivity.

DSServer PC Requirement

REQUIRED MINIMUM SPECIFICATIONS	DSSERVER PC
RESOLUTION	4K Resolution
PROCESSOR	Intel Xeon E7
MEMORY	32GB
STORAGE	8TB and above SATA Disk
NETWORK CARD	1 Gbps or above
OPERATING SYSTEM	Windows Server 2019 Standard

DSSERVER ARE COMPATIBLE WITH

MoticEasyScan Pro Series

MoticEasyScan Infinity Series

MoticEasyScan Two Series

Motic America

Motic Instruments (Canada)

130 - 4611 Viking Way, Richmond,
BC V6V 2K9 Canada
